

Wastewater Systems Effluent Regulations Web Information Session (Webinar)

Environment Canada will provide information and answer questions via a webinar on the requirements of the *Wastewater Systems Effluent Regulations* on **Wednesday, April 9th, 2014** at **11:00am** Atlantic Time.

A webinar requires a computer with high-speed Internet access, as well as a telephone. The visual part of the presentation will be through the Internet, and the audio portion by telephone. Below is a link that will allow you to register for the webinar.

Upon clicking on this link, you will provide your name, email address, phone, organization name, city and province on the registration page. Upon completion of the registration page, you will receive a message by email with a toll-free teleconference number and passcode as well as an Internet link that you will use to access the online presentation. Prior to the start of the webinar on April 9th at 11:00am Atlantic Time, call the number provided in the email and enter the passcode in order to connect to the teleconference. Then click on the link provided in the email. You will be asked to enter your first and last name, email address and the password if requested (password is **wser**). You will then be able to view the slides of the presentation on your screen. The teleconference will be moderated by an operator who will explain how the teleconference will work and they will also moderate the question and answer session that will take place after the online presentation.
